17

Practice Set - 1

1) Write a Program of sum of three numbers in Java.

```
public class sum
```

```
{ public static void main (String [] args)
```

```
{ int a = 30;
```

```
int b = 40;
```

```
int c = 70;
```

```
int sum = a + b + c;
```

```
System.out.println ("The Sum of a given three  
number is : ");
```

```
System.out.println (sum);
```

```
}
```

2) Write a Program to calculate CGPA using marks of three subjects (out of 100).

3) Write a Java Program which ask the user to enter his/her name and greets them with 'Hello <name> have a good day.'

4) Write a Java Program to convert Kilometres to miles

5) Write a Java Program to detect whether a number entered by the user is integer or not.
