

PRACTICE - SET - 7

1) Write a Java method to print multiplication table of a given number n ;

2) Write a program using functions to print the following pattern:

```

12      *
        * *
        * * *
        * * * *
  
```

3) Write a recursive function to calculate sum of first n natural numbers.

4) Write a function to print n^{th} term of Fibonacci Series using recursion.

5) Write a function to find average of a set of numbers passed as arguments.

6) Write a function to find the value of x^n using recursion.

7) Write a function to find the value of x^n using recursion.

8)
